PROFESSIONAL SUMMARY

ACM Hackathon-winner, 3rd-year Information Technology student with experience in software development and AI-driven applications. Proficient in Python, Java and JavaScript. Motivated and detail-oriented Computer Science student seeking internship opportunities in Software Engineering, AI, and Data Science/Analytics. Passionate about building scalable applications, extracting insights from data, and solving real-world problems. Eager to learn, contribute, and grow in a collaborative and innovative environment.

INTERNSHIP EXPERIENCE

AI Intern — Edunet Foundation *Apr 2025 – May 2025*

- Situation: Edunet required a hands-on AI project demonstrating end-to-end supervised learning on real financial data within a 4-week internship window.
- Task: Build a functional Stock Price Predictor – from raw data ingestion through model training to visual output – using Python and core ML libraries.
- Action: Collected and preprocessed multi-year historical OHLCV data via the yfinance API; engineered lag and rolling-window features; trained and evaluated a Linear Regression model; visualised predicted vs. actual price trajectories using Matplotlib; researched LSTM-based architectures and sentiment analysis integration as future improvements.
- Result: Delivered a fully working predictor with clear evaluation metrics; strengthened practical proficiency in Python, pandas, scikit-learn, and data visualisation within the internship timeline.

Artificial Intelligence Intern — Coincent ai *Apr 2025 – May 2025*

- Situation: Joined Coincent AI as an Artificial Intelligence Intern during a 2-month engagement focused on applying AI to real-world business problems.
- Task: Tasked with developing and deploying AI models end-to-end, from raw data preprocessing through to working deployment pipelines under production-like conditions.
- Action: Applied machine learning and deep learning techniques to build AI-driven solutions; handled data preprocessing workflows to ensure clean, model-ready inputs and contributed to deployment workflows to make models operationally viable.
- Result: Gained hands-on, end-to-end exposure to the full AI model lifecycle, from data to deployment strengthening applied skills in ML/DL within a real-world AI product environment.

System Administrator Intern — ServiceNow *Mar 2025 – Apr 2025*

- Situation: The organisation needed an administrator capable of managing and troubleshooting its ITSM platform to ensure smooth IT service operations.
- Task: Configure user access, manage admin dashboards, and develop hands-on proficiency with core ServiceNow modules within a 2-month engagement.
- Action: Managed admin dashboards and performed user impersonation for targeted troubleshooting; navigated and maintained the Knowledge Base; configured role-based user access and custom module settings aligned with ITSM best practices.
- Result: Built a strong operational foundation in ServiceNow platform administration; enabled faster issue resolution cycles and improved access governance across the instance.

TECHNICAL PROJECTS

MindMate — AI Mental Health Web Application | *Python · NLP · LLM APIs · React · Node.js · REST APIs · WebRTC*

- Architected and built a full-stack AI-powered mental wellness platform delivering empathetic, context-aware conversational therapy via a fine-tuned LLM backend – functioning as a 24/7 virtual AI psychologist capable of active listening, mood detection, and personalized coping-strategy recommendations.
- Engineered a real-time human escalation pipeline that intelligently detects crisis signals in user conversations and seamlessly connects users with verified licensed psychologists via in-app scheduling,

secure chat, and WebRTC-based video sessions – bridging AI support and professional mental healthcare in a single unified interface.

- Implemented session memory, sentiment-trend tracking, and a clinician dashboard surfacing anonymised mood analytics; applied end-to-end encryption and HIPAA-aligned data handling to safeguard sensitive user information.

HackMate — Hackathon Discovery & Team-Building Platform [In Development] | *React · Node.js · Express · MongoDB · WebSockets · REST APIs*

- Designing and building a full-stack web platform that aggregates hackathon listings from multiple sources into a single searchable, filterable directory – solving the fragmented hackathon discovery problem for students across institutions.
- Built an intelligent cross-college team-formation engine allowing students to create skill-tagged profiles, discover open team slots, and send collaboration requests; role-matching algorithm surfaces compatible teammates based on tech-stack complementarity.
- Implemented real-time notifications via WebSockets for team invites and hackathon deadlines; architected MongoDB data model to support multi-college participation, team versioning, and project submission tracking.

Stock Price Predictor | *Python · yfinance · scikit-learn · Matplotlib · LSTM*

- Collected and preprocessed multi-year historical OHLCV data via the yfinance API; engineered lag features and rolling-window statistics as model inputs.
- Built a Linear Regression baseline and benchmarked against an LSTM-based deep learning model; achieved 91% directional accuracy on test splits.
- Implemented Matplotlib dashboards to visualise predicted vs. actual price trajectories and confidence intervals.

LEADERSHIP & COMMUNITY

Technical Head — Indian Society for Technical Education (ISTE) *Aug 2024 – Present*

- Spearheaded a 5-day AI Prompt Engineering Workshop, curriculum-designing of events, hands-on labs covering LLM fundamentals, chain-of-thought prompting, and real-world use cases for 60+ student attendees.
- Coordinated with industry professionals to deliver guest sessions; managed event logistics, scheduling, and post-event feedback analysis.

Cohort 3 Member — WE Hub Flint Program (Govt. of Telangana Women Entrepreneurship Hub) *2024*

- Selected among a competitive cohort of women technologists; participated in mentorship, entrepreneurship, and innovation sprints focused on AI-driven product ideation.

KEY ACHIEVEMENTS

- Winner - ACM-W Inter-College Ideathon (AI/ML Track), 2026
- Organizer & Lead Facilitator — 5-Day AI Prompt Engineering Workshop (60+ attendees), 2025
- Selected Cohort -WE Hub Flint Program, Govt. of Telangana, 2024

CERTIFICATIONS & CREDENTIALS

- PwC Switzerland – Power BI Job Simulation (Jan 2025)
- Udemy Certified Data Analytics for Data Science and Business (May 2025)
- Deloitte Australia – Data Analytics Job Simulation (Jan 2025)
- Scaler Certified Computer Networking Course (Mar 2025)
- Hewlett Packard Enterprise – Software Engineering Job Simulation (Jan 2025)
- Tata Group – Data Visualisation: Empowering Business with Effective Insights Job Simulation (Mar 2025)
- Certified in Data Science by Infosys Springboard (Jun 2025)
- Introduction to Data Science – Infosys Springboard (Jun 2025)
- Introduction to Natural Language Processing – Infosys Springboard (Jun 2025)
- Microsoft Certified: Azure AI Fundamentals (Jan 2024)
- Artificial Intelligence with Python – Coincent (Jan 2024)

- Introduction to Generative AI Studio – Google Cloud / Simplilearn (May 2025)

TECHNICAL SKILLS

Languages: Python, JavaScript, C (Data Structures), SQL

AI / ML: scikit-learn, TensorFlow/Keras, NLP (TF-IDF, spaCy), Prompt Engineering, LSTM

Cloud: AWS (Solution Architecture), Oracle Cloud Infrastructure, Google Cloud (GenAI Studio)

Web & Mobile: Node.js, Express, HTML/CSS, REST APIs, Android SDK (Java), Firebase

Data & BI: Power BI, Pandas, Matplotlib, DBMS (SQL/Relational), Data Analytics

Tools & Practices: Git, ServiceNow (ITSM Admin), Agile, OWASP Security, yfinance

EDUCATION

Bachelor of Engineering — Information Technology Jul 2023 – Aug 2027 (Expected)

Stanley College of Engineering and Technology for Women, Hyderabad

Intermediate 11th-12th — MPC (Mathematics, Physics, Chemistry) Jun 2021 – Apr 2023

Sultan ul Uloom Junior College, Hyderabad

School Completed Apr 2021

Mount Mercy High School, Hyderabad
